

Quality Policy

UEM is committed to being a world class producer of cast and forged piston applications. Product quality is one of our core values, as well as one of our key business strategies. UEM operates a documented Quality Management System in compliance with ISO 9001:2015. As part of this commitment, our team is focused on upholding the eight principals of QMS

Quality Principles

•Customer focus

Listening to our customers and ensuring their success, securing mutual benefit to all.

•Leadership

Establishing a unity of purpose, defining expectations, and creating an environment in which employees can become fully involved in the direction of the organization.

•Involvement of people

Retaining competent employees, encouraging continuous enhancement of their knowledge and skills, and empowering them, encouraging engagement and recognizing achievements.

•Process approach

Recognizing that the most efficient way to manage our business is through clearly defined processes.

•Systems approach to management

Organizing, Identifying, understanding and managing interrelated processes as a system.

•Continuous improvement

Upholding continual improvement as a permanent objective of the organization.

•Factual approach to decision making

Understanding that decisions should be made by gathering facts, objectively analyzing data.

•Mutually beneficial supplier relationships

Assuring that all divisions, vendors, and suppliers are essential partners in our quality system.
