

For the Perfect Fitting Skirt...

Abradable Powder Coatings *Hone In* - Creating the Perfect Skirt to Cylinder Wall Geometry for Each Cylinder

How do APC coatings affect your ICON piston skirt?

- Spreads load to the entire skirt.
- Creates an optimum oil film over the entire skirt.
- Reduces running clearances.
- Squares the piston to the bore - drastically reducing piston rock.
- Squares the rings to the bore.
- Reduces friction. How? go to: www.line2linecoatings.com/video2.html

IMPORTANT - When you create the optimal piston skirt - all other components will function at their optimum level. APC coating comes standard on certain ICON Shelf Stock pistons and also available as an option on any UEM brand piston.
